Virtual Access solutions help utility companies provide a reliable supply of electricity and water to our homes; they ensure safe and reliable public transportation and keep many other services we rely on every day available. As we strive towards a greener and smarter future, we are committed to reducing our own environmental impact, as well as developing robust and resilient technology that can contribute to the sustainability goals of others.

We have established this environmental policy to be consistent with the purpose and context of our business. It provides a framework for the setting and review of environmental objectives in addition to our top management promoting committal to continual improvement of the Environmental Management system to enhance environmental performance.

This is facilitated through the setting of documented environmental objectives based on our significant environmental aspects, compliance obligations and considering our risks and opportunities. Action plans have been set to achieve objectives and are maintained as part of the Environmental Management System internal auditing, monitoring and management review processes. The results of which are communicated to interested parties, where appropriate.
